## pp00ab

Constructs Poincaré plot and "approximate" rotational-transform (for single field line).

[called by: .]

## contents

1	pp00ab	1
	1.0.1	relevant input variables
	1.0.2	rotational-transform

## 1.0.1 relevant input variables

- 1. The resolution of Poincaré plot is controlled by
  - nPpts iterations per trajectory;
  - odetol o.d.e. integration tolerance;

The magnetic field is given by bfield.

## 1.0.2 rotational-transform

1. The approximate rotational transform is determined by field line integration. This is constructed by fitting a least squares fit to the field line trajectory.
